ANNUAL BOARD REPORT 2013	26–30
FINANCIAL STATEMENTS 2013	31-52

## Dear readers,

2013 was a significant year for us in a number of ways. The major change process behind the creation of Aalto University has now reached the final straight; and its results began to make themselves felt in impressive academic achievements last year. The number of international refereed scientific articles and degrees both rose significantly, as did the amount of competitively awarded research funding we received. These figures underline the impact that Aalto University now has in society and in the scientific community. We are particularly proud of our tenure track career system, which has enabled us to recruit some leading names to chairs at the university, from Finland and abroad. The international nature of the university is also developing rapidly; over 30% of our new professors now come from outside Finland.

Teaching at Aalto University has been reformed to match future needs in terms of expertise. We launched our first new bachelor's and master's degree programmes in autumn 2013, and the reform process is continuing. Doctoral programmes were also developed last year. I believe that this work will be reflected in the future in the shape of graduates equipped with a better set of capabilities for developing Finnish business and society. World-class research and teaching call for predictable, long-term, and sufficient funding if we are to meet our targets. Finland's universities largely depend on the State for their funding, and this funding, ours included, has been cut because of the difficult economic situation facing the government. Despite these cuts, we have striven to keep up the momentum of our reforms, by looking for new sources of finance and introducing greater cost efficiency in our services, for example.

I am very happy to see the continuing spread of the Aalto spirit within our community. I sense a true passion for discovering new things, making an impact, and being proud of what we do at Aalto. Our faculty members are genuinely interested in the success factors that will be critical to Finland's future, and all of our faculty are strongly committed to creating a strong foundation for growth. Basic and applied research go hand in hand; high-quality research is essential in both areas. We cannot afford to be followers here; we must aim to be at the forefront of development. We also believe that long-term, ambitious cooperation within the academia and the corporate sector will produce the most valuable results.

I would like to warmly thank our staff and our students for their outstanding contributions last year. My thanks also go to our numerous partners and the productive collaborative work that we carried out together.

Tuula Teeri
President

# Key achievements in 2013

Refereed scientific articles	+7%
Competitive research funding	+ 6%
Master's degrees	+ 6%
Doctoral degrees	+ 19%
Patent applications	+210%
International faculty	+ 11%
Service personnel	- 6%
Space used by the university	-3%

change compared to 2012

## **New Aaltonaut minor launched**

A new interdisciplinary minor subject intended for bachelor degree students, known as Aaltonaut, was launched in 2013. Aaltonaut courses are based on inquiry- and problem-based learning, together with group work in interdisciplinary groups.

## Slush attracted thousands of visitors

One of Europe's most important events for start-ups, *Slush*, was held for the sixth time in 2013, and attracted some 5 000 visitors and over 1 000 companies. The venture capital in play at the event was estimated to be in the order of €60 billion.

# Professor Maarit Karppinen awarded €2.4 million in funding

Academy Professor Maarit Karppinen of the School of Chemical Technology was awarded an Advanced Grant by the European Research Council (ERC) for a project to develop new functional hybrid materials.

# Vision and goals

Vision		and succeed at Aalto University, an ins accognised for the impact of its science,

## Strengthening Finnish know-how

Aalto University is a foundation-based university where science and art meet business and technology. The university has set itself the goal of becoming a world-class university by 2020.

Aalto University is committed to achieving this ambitious goal by prioritising high standards of research and artistic activities, quality education that highlights the needs of students, and close collaboration with companies and the rest of the business world. The university highlights the importance of – and the need for – quality and international competitiveness in all of its activities.

## High-quality teaching and research

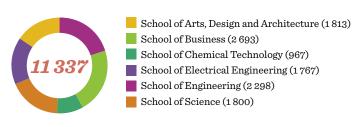

Aalto University's tenure track system for faculty members plays a central role in achieving its core goal. The system offers researchers a clear and well-supported path to professorial-level positions, and is based on clearly defined targets and incentives and providing comprehensive support for personal, professional, and academic growth. A total of 155 new professors had been appointed under the system by the end of 2013.

## **Aalto University has**

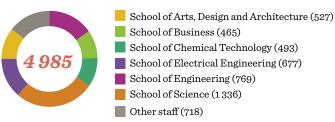

- · Six schools
- 11 337 students<sup>1</sup>
- 382 professors
- €418 million of funding and expenditure of €420 million (2013).

Aalto University is also committed to improving the quality of its activities through continuous evaluation of its research and teaching, focusing its activities, and promoting different types of cooperation. Joint discussions on how Finland's technical universities can best deploy their expertise and work together also play a part in helping Aalto concentrate its resources where it is strongest.

### Students (FTE)

## Faculty and staff as of 31 December 2013

<sup>&</sup>lt;sup>1</sup> Full-time equivalent (FTE) students. The total number of degree students is 19 683.

#### Creating new jobs by working together

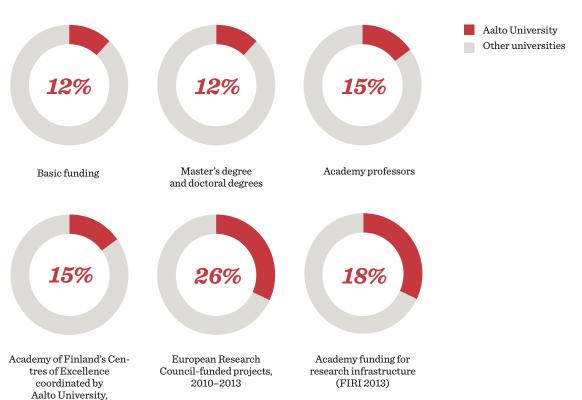

The university's professors, researchers, and students work closely together with a number of companies and organisations. This broad-ranging collaboration is designed to achieve new breakthroughs that will help companies innovate and develop.

Promoting entrepreneurship, educating entrepreneurs, and entrepreneurship-related research are important for Aalto University. The Aalto Ventures Program operated together with Stanford University gives all the university's students a basic set of entrepreneurial skills. Aalto has also contributed to the birth of a number of major new start-ups as well as initiatives such as Slush, which was named Europe's best forum for start-ups and angel investors in 2013.

#### Focusing resources on core activities

Aalto University believes in focusing resources on its core activities: teaching and research. The university also needs to develop its service functions and find new and better ways of using its facilities. The university's main campus is being developed at Otaniemi in Espoo, as this will ensure both a more effective use of Aalto's facilities and buildings and promote a greater range of interaction within the Aalto community.

## Aalto University's position in the Finnish university field

2008-2019

## Aalto University's six schools

## School of Arts, Design and Architecture

### Focus areas

- User-driven design and art
- · Art and design, science, and business
- Tradition-based forerunning
- · Sense-based skills and knowledge

## **Strengths**

- Internationally acclaimed track record in artistic activities
- · Creating inspiring environments
- · Experience-driven engagement
- · Strong background in the Finnish design, architecture, and art tradition

## Major infrastructure

• Media Centre Lume Lume is a national education, research, development, and production centre for audiovisual media.

## **Highlights of 2013**

### New cross-disciplinary initiatives: Living+ and ChemArts

The *Living+* programme is continuing the work carried out by the city of Helsinki and Aalto University during the city's time as World Design Capital Helsinki in 2012. The ChemArts project is concentrating on developing new design products from wood-based cellulose, and is part of the Design Driven World of Cellulose project coordinated by the School of Chemical Technology.

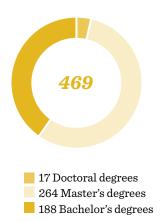

## Two awards for an innovative wooden building

The pavilion designed by the Aalto University Wood Studio built for the World Design Capital Helsinki 2012 as a new kind of meeting place and venue for urban events received two awards - a 'Shingle' and a 'Construction Rose' - from the Finnish Association of Architects (SAFA) and the City of Helsinki respectively.

## The Date wins the Short Film Jury Award at Sundance

The Date, a short film by Jenni Toivoniemi, a student of film directing and screenwriting, won the Short Film Jury Award at the 2013 Sundance Film Festival. Founded in 1978 by Robert Redford, Sundance is one of the world's most important film festivals.

### **Graduates in 2013**

### Grand Prix at the Hyères Fashion Festival

Satu Maaranen, a Master of Arts graduate of the Department of Design, won the Grand Prix for her women's collection at the international Hyères Fashion Festival in France, opening the door for her to some of the world's top fashion houses. The School of Arts, Design and Architecture is the first school whose students have won the competition twice in succession.

### Silver European Design Award to two graphic design students

Jenni Viitanen and Ulla Eronen won the Silver European Design Award for the graphic design and layout of a double issue of the magazine, Tuli & Savu (Fire & Smoke). A total of 1048 entries were submitted to the competition.

## Professor Petteri Nisunen wins World Cultural Council award

Professor of Practice, Petteri Nisunen, and his collaborator, Tommi Grönlund, are highly accomplished artists with an international reputation and an interdisciplinary approach that brings together art, design, architecture, and science. They received the Leonardo da Vinci World Award of Arts in recognition of their achievements in art, science, and education.

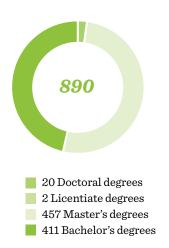

## **School of Business**

#### Focus areas

- · Strategic management and marketing
- · Microeconomics
- · Behavioural finance and corporate governance
- · Decision-making

#### Strengths

- Extensive high-level cooperation
- Leading international partners
- · Triple Crown accreditation

## **Highlights of 2013**

## New bachelor's and master's degree programmes

The school's degree programmes were reformed in 2013. One bachelor's programme is now taught in Helsinki and one in Mikkeli; and there are 12 master's programmes. The revised bachelor's programme in Helsinki concentrates on student-driven, problem-based learning.

## Professor Matti Rossi received the **Millennium Distinction Award**

Professor Matti Rossi of the Department of Information and Service Economy received the Millennium Distinction Award from the Technology Academy of Finland (TAF) for his work in promoting the use of open source code. TAF's Millennium Distinction Awards are given to researchers and companies active in the same field as the winners of the Millennium Technology Prize.

## Professor Sixten Korkman received the State Award for Public Information

Professor of Practice Sixten Korkman is a highly respected economist who has been particularly active in popularising economics and global economic developments for many years. His work in this area was recognised in 2013 with the State Award for Public Information. He was also named Director of the Year by Procom – the Finnish Association of Communications Professionals - for his accomplishments in this area in 2013.

### EQUIS accreditation renewed for another five years

The School of Business' accreditation under the European Quality Improvement System (EQUIS) was renewed for another five years, from 2013 to 2018. The school has received quality accreditation from the world's three most influential associations: AACSB, AMBA, and EQUIS. Less than 1% of the world's business schools have this Triple Crown accreditation.

## €1.8 million granted to the New Global project

Tekes, the Finnish Funding Agency for Technology and Innovation awarded funding for the New Global project as part of its 2013 round of funding for strategic research openings. The New Global is a multidisciplinary innovation research project aimed at creating innovations with a small resource footprint for low-income emerging markets and new business opportunities for Finnish companies. Professor Minna Halme is the project's director.

# School of Chemical **Technology**

#### Focus areas

- · Process technology
- · Industrial biotechnology
- · Biomaterials science
- · Metals and minerals recovery processes
- · Active and functional materials

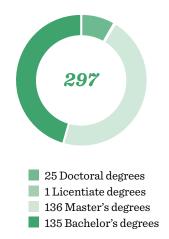

## **Strengths**

The impact of cutting-edge research on society

· Combining know-how in the natural sciences with expertise in bioscience and engineering

## Major infrastructure

· Bioeconomy infrastructure ture is concentrated on process technology, industrial biotech-

The research carried out using the school's bioeconomy infrastrucnology, and new materials.

## Highlights of 2013

## A new textile fibre was developed by Professor Herbert Sixta and his team

The world's first cellulose fibre produced using the 'Ioncell' process offers an ecological alternative to cotton and viscose. Developed under the auspices of the Finnish Bioeconomy Cluster's research programme, the fibre was used to produce a scarf in collaboration with the School of Arts, Design and Architecture.

## Biofactory selected for inclusion in the national research infrastructure road map

Aalto University and VTT's joint bioeconomy infrastructure was selected for inclusion in the Academy of Finland's national research infrastructure road map, underlining Aalto's central role in bioeconomy-related research and teaching. Academy Professor Jukka Seppälä is coordinator of the Biofactory project.

## Two projects included in Tekes' strategic openings

Professor Janne Laine of the Department of Forest Products Technology is responsible for coordinating the Design Driven World of Cellulose project aimed at identifying new smart ways of using wood-based cellulose. Professor Sami Franssila of the Department of Materials Science and Engineering is part of the 3i - Innovative Induction Initiative, launched to explore new therapies for patients with heart and brain diseases.

## Professors involved in cutting-edge projects

Professors Markus Linder and Janne Laine are among those involved in the work of the Academy of Finland's Centre of Excellence in the Molecular Engineering  $of\,Biosynthetic\,Hybrid\,Materials.\,$ Professors Pekka Taskinen, Seppo Louhenkilpi, Kari Heiskanen, Olof Forsén, Jari Koskinen, and Simo-Pekka Hannula are involved in new research projects coordinated by the Finnish Metals and Engineering Competence Cluster (FIMECC) scheduled to run from 2014 to 2018.

# **School of Electrical Engineering**

#### Focus areas

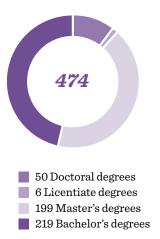

- · Energy and environment
- · Health and wellbeing
- · Information and communication technology ICT
- · Micro- and nanotechnology

#### Strenaths

- Expertise in cutting-edge technology and systems
- · Energy and sustainable development
- · Multidisciplinary research
- · Respected international research environment

#### Major infrastructure

- · Micronova: Aalto Nanofab  $Develops\ innovative, enabling\ technologies\ and\ applies\ them$ to micro- and nanosystems.
- · Metsähovi Radio Observatory Carries out research in radio technology, radio astronomy, and space technology.

## Highlights of 2013

## **Assistant Professor Hele Savin wins** Young Scientist 2013 Prize

The solar energy-related innovations developed by Assistant Professor Hele Savin of the Department of Micro- and Nanosciences won her a prize from the World Economic Forum (WEF). She was also invited to speak at the WEF's Annual Meeting of New Champions 2013 conference.

## Professor Antero Arkkio awarded funding worth €2.5 million

Professor Antero Arkkio of the Department of Electrical Engineering was awarded an ERC Advanced Grant for electromechanical research into energy loss. Electrical machinery typically uses only 90-95% of the energy used to power it. The reason for some of this energy loss remains unknown and the aim of Professor Arkkio's team is to identify the reasons involved, which costs billions of euros a year in the EU alone.

## SCAMPI: transferring data on mobile devices without the need for operator networks

Professor Jörg Ott of the Department of Communications and Networking and his research team have developed the SCAMPI platform, which enables mobile devices that are close to each other to exchange data, such as images and video clips, without the need for operator networks. Applications can also be sent directly from one device to another, bypassing the need for app stores. Possible future applications for this technology include developing countries and areas affected by natural catastrophes that have destroyed their networks.

## Professor Zhipei Sun writes lead article in Nature Photonics

Associate Professor **Zhipei Sun** of the Department of Micro- and Nanosciences was invited to write an article for *Nature Photonics*. The article, which appeared in the November 2013 issue, covered recent developments in ultrafast fibre lasers based on carbon fibre nanotubes and graphenes, and their future prospects.

# **School of Engineering**

#### Focus areas

- · Arctic technology
- · Mechanics and material technology
- · Multidisciplinary energy technologies
- · Sustainable built environment
- · Systems design and production

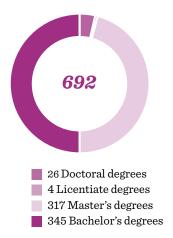

#### **Strengths**

- Renew technologies for industry and built environment based on scientific knowledge and research
- Create innovative solutions in our focus areas for sustainable development
- · Provide high-quality teaching and educate experts valued by society

· Aalto Ice Tank

The Aalto Ice Tank is a multipurpose basin used for researching physical phenomena associated with ice, ships, and marine structures, and for testing theoretical models covering arctic marine technology and ice mechanisms.

## Highlights of 2013

# Research Centre of Excellence in Arctic Shipping and Operations

The Lloyd's Register Foundation granted funding for an international Research Centre of Excellence in Arctic Shipping and Operations headed by Aalto University. The Centre will support eight doctoral dissertations on risk management in Arctic operations over a period of five years.

## Professor Sven Bossuyt received Academy of Finland Award

The considerable scientific courage and ambition of Academy Research Fellow, Professor **Sven Bossuyt** in moving between a number of different fields of study – from physics and materials science to mathematics and experimental mechanics – saw him win the 2013 Academy of Finland Award. Professor Bossuyt's multidisciplinary expertise has given him the ability to make bold scientific leaps that, if successful, are capable of making a very valuable contribution to advancing both theory and practice.

# The Academy of Finland's new Centre of Excellence in Laser Scanning

A research group headed by Professor Hannu Hyyppä, the head of the Research Institute of Measuring and Modelling for the Built Environment, will be part of the Academy of Finland's new Centre of Excellence in Laser Scanning that will operate between 2014 and 2019. The centre is coordinated by the Finnish Geodetic Institute.

# Professor Jukka Tuhkuri appointed to the national Arctic Advisory Board

Professor of Applied Mechanics, **Jukka Tuhkuri**, was appointed an expert member of the board set up to monitor implementation of Finland's new strategy for the Arctic region. Finland's goal as part of this strategy is to promote growth and enhance competitiveness in the region, while respecting the special nature of the Arctic environment.

## School of Science

#### Focus areas

- · Computational and mathematical sciences
- Condensed-matter and materials physics
- · Energy sciences
- · Computer sciences
- · Neuroscience and -technology
- · Creating and transforming technology-based business

#### **Strenaths**

- World-class research in a number of areas
- · Degree programmes attract the best science and technology students nationally
- · Cooperation with companies and supporting technology-based entrepreneurship

#### Major infrastructure

· Cryohall

A dedicated environment for research in low temperatures and nanoelectronics.

- · Nanomicroscopy Center Features a range of high-resolution microscopes, including numerous scanning electron microscopes.
- · Aalto NeuroImaging Specialises in non-invasive neuroimaging technologies.
- · Science IT Computational research infrastructure, featuring the flagship Triton Cluster.

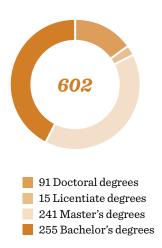

## Highlights of 2013

### Funding for two new Centres of Excellence

The Academy of Finland established a Centre of  ${\bf Excellence\ in\ Molecular}\ Engineering\ of\ Biosynthetic$ Hybrid Materials at School of Science that will operate between 2014 and 2019. The school is also involved in the Centre of Excellence on Research on Solar Long-Term Variability and Effects initiative, which will run for the same period. The School also continues to be active in four other centres of excellence established earlier.

### Partner in two EU flagship projects

Professor Pertti Hakonen of the Low Temperature Research Group and Professor Harri Lipsanen of the Department of Micro- and Nanosciences, together with their research teams, are responsible for sensor development and the production of high-frequency transistors as

part of the Graphene Flagship project. Academician Riitta Hari and Professor Lauri Parkkonen of the Department of Biomedical Engineering are responsible for the Social Brain section of the Human Brain project.

#### **ERC** funding for three researchers

Professor Päivi Törmä of the Department of Applied Physics was awarded an Advanced Grant of €1.6 million by the European Research Council (ERC) to investigate quantum phenomena. Academy Research Fellow and Assistant Professor in the Department of Information and Computer Science, Petteri Kaski, was awarded an ERC Starting Grant of €1.1 million to study advanced search and enumeration technology. Assistant Professor Juha Silvanto received an ERC Starting Grant of €1.3 million for brain research.

## Research infrastructure included in the national roadmap

All the school's major research infrastructure assets were selected for inclusion in the national roadmap in 2014. The infrastructure in question covers research into nano-scale structures and materials, low-temperature phenomena, and brain- and neuroimaging.

## €1.7 million in funding awarded to the Revolution of Knowledge Work project

Tekes granted strategic research openings funding to the Revolution of Knowledge Work research consortium, comprising the Helsinki Institute for Information Technology HIIT - a joint research institute of Aalto University and the University of Helsinki - and the Finnish Institute of Occupational Health's Brain Work Laboratory. The consortium is researching search and processing methods aimed at combining the creativity of humans with the ability of computers to process large masses of data.

## Investments in research reflected in results

Research at Aalto University aims to be long-term, of a high standard, and have a scientific and social impact.

The tenure track system introduced in 2010 is Aalto University's most important strategic investment and innovation to date. The first evaluations of success in the professors' tenure track career system, and the follow-up appointments based on them were made in 2013.

A total of 231 tenure track positions have been allocated to the university's focus areas, of which 155 were filled by the end of 2013. 31% (30%) of the professors who have been appointed to date are non-Finns and 24% (21%) are women. The average age of those appointed is 42.5 (43). Aalto University's tenure track continues to attract a lot of international interest, and two thirds of applicants are non-Finns.

The investment in the tenure track system has borne fruit. Research funding received from the Academy of Finland and the European Research Council increased significantly during 2013. The Academy of Finland granted the university 48% more competitive research funding during the year than in 2009. Funding from the European Union increased even more, with 82% more received in 2013 than in 2009.

During 2013, Aalto University had:

- 13 (12) European Research Council (ERC) research grants
- 7 (7) Academy Professors appointed by the Academy of Finland
- 34 (37) Academy Fellows appointed by the Academy of Finland, and
- 14 (15) FidiPro professors and fellows funded by the Academy of Finland and Tekes.

Three of Finland's 12 academicians in the sciences have worked at the university. Professor **Riitta Hari** is still at Aalto University and Emeritus Professor **Teuvo Kohonen** and **Pekka Jauho**, the former President & CEO of VTT, both had a long career at the Helsinki University of Technology, one of the predecessors of today's Aalto University.

Aalto University is the only Finnish university included in the European Union's two FET Flagship projects devoted to brain and graphene research.

The university has also been successful in receiving funding under Tekes' new strategic research openings. Four projects had received funding by the end of 2013, and Aalto University had been named coordinator of three of them and a partner in the fourth. Projects approved for inclusion in the openings are required to be visionary, bold, and multidisciplinary in nature.

#### Highly ranked in international reviews

There are more than 17 000 universities worldwide and around 1 000 in Europe, depending on which figures are used. Aalto University monitors how it is ranked internationally in the various fields in which it specialises and tracks reviews that measure the social impact universities have and the contribution they make to the business world.

The Academic Ranking of World Universities (ARWU) published by Shanghai Jiao Tong University measures world-class performance using indicators such as the number of Nobel prizes won by universities and how many of their publications are included in the world's two most respected scientific journals. ARWU's field- and subject-specific rankings have placed Aalto University's engineering and business economics in the best 151-200 worldwide.

The QS World University Rankings emphasise not only a university's reputation, but also the number of research papers it produces and the citations they receive, as well as the international nature of its activities. Aalto University was ranked among the 200 best universities worldwide overall in the review published in autumn 2013, and among the top 100 in some specific subjects.

Leiden University's ranking focuses on the scientific impact that university publications have. Based on the average citation index of publications, Aalto University was ranked 264th in 2013 and among the world's top 10 universities when comparing joint publications produced by universities and companies.

Rankings produced by the Financial Times are the most important for the School of Business and Aalto University's executive education services. Aalto University placed 29th in the FT European Business School Ranking in 2013, and  $43^{\rm rd}$  in the global Masters in ManagementRanking. Aalto Executive Education was ranked 41st in the Financial Times Executive Education Ranking.

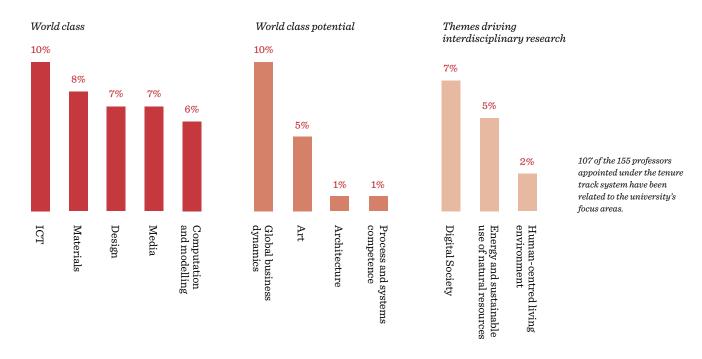

There are no comprehensive ranking systems covering architecture, art, and design. Aalto University has placed well in the small-scale comparisons produced by professional publications covering these fields. The respected Italian magazine, Domus, for example, ranked Aalto's architectural teaching as among the 100 best worldwide in 2013.

## Multidisciplinary research programmes

Aalto University aims to offer solutions based on multidisciplinary research addressing a number of major challenges facing modern society. The AaltoEnergy Efficiency Programme, for example, was launched in 2012 and six new projects were initiated as part of the programme during 2013. The university has committed itself to providing €12 million in finance for the programme between 2012 and 2017.

A number of platforms have been developed to support multidisciplinary research and teaching at Aalto. An energy platform was created in 2013, and the *Living+* platform for the built environment piloted. Planning work on the DIGI platform for the digital society was launched towards the end of the year.

## Professors appointed to focus areas

## Discussions between Finnish universities of technology on sharing their responsibilities

Finland's universities of technology have discussed profiling their roles, how they work together, and how they can best share responsibilities in the technological field since 2011. These discussions have primarily focused on defining the subjects covered by specific professorships and teaching-related collaboration.

Discussions were extended in 2013 to cover education and infrastructure. University presidents have also started to hold regular annual strategic discussions on universities' plans for the next few years and longer term.

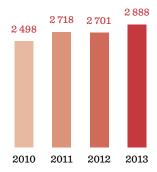

## **Funding for infrastructure**

Research and teaching infrastructure - in the shape of equipment, facilities, material, dedicated premises, and services - plays a key role for universities of technology and the arts. Aalto University has nine major infrastructure areas; these are covered by a series of projects, for which specific targets and areas of operations have been set and separate funding earmarked. A joint steering group for the university's infrastructure resources was established in 2013.

The Academy of Finland updated the strategy and roadmap for Finland's national research infrastructure in 2013. Two of Aalto University's infrastructure resources - the microand nanotechnology facilities at Otaniemi and the Biofactory, a cutting-edge alliance dedicated to the sustainable processing of biomass - were approved for inclusion in the roadmap. The university is also closely involved in five other infrastructure areas included in the national roadmap.

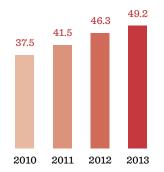

Aalto University also did well in the FIRI research infrastructure application process organised by the Academy of Finland during 2013. A total of €2.6 million in funding was granted to four infrastructure projects.

## Number of refereed articles in scientific publications

According to the MinEdu definition (A1-A4); limited to international publications.

### Competitive research funding, M€

 $External\ competitive\ research$ funding from the Academy of Finland, Tekes FiDiPro and EU research funding programmes.

## An international review of the artistic activities

Art, architecture, and design are major engines of social change, alongside science. Developing arts- and research-related collaboration that cuts across conventional boundaries is a priority at Aalto University.

The review concluded: high standard internationally

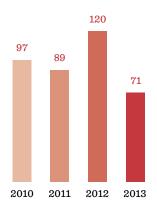

An international evaluation group, Scientific and Artistic Advisory Board (SAAB), reviewed artistic activities at Aalto University in May 2013. The SAAB's report concluded that the university produces well-educated experts with good potential for developing their fields and enriching cultural life generally. The report also concluded that students at the School of Arts, Design and Architecture are successful in their fields nationally and internationally already before graduation.

The SAAB also reviewed the impact of the School of Arts, Design and Architecture's artistic activities based on exhibitions and awards. Its report concluded that all the school's departments have a good level of impact internationally, while some have a particularly high level of impact.

## Methods used for assessing quality

Aalto University is the first university in Finland to create a set of methods for evaluating the quality of artistic activities. A range of quality indicators were introduced alongside more traditional scientific ones in 2013. Work in this area will continue and will be carried out in close cooperation with national and international partners.

## International artistic productions

## Revamped degree programmes and teaching facilities

In addition to an ambitious academic curriculum, promoting a culture of creativity and entrepreneurship and preparing the students for entering professional life are key goals of our teaching.

The target for doctoral and bachelor's degrees werw exceeded

Aalto University educates: engineering, business, and arts students studying for doctorates architecture, landscape architecture, engineering, business, and arts students studying for master's degrees, and business, arts, and engineering students studying for bachelor's degrees.

A total of 229 (192) post-graduate students completed their doctorates in 2013. 1614 (1519) master's degree students graduated during the year and 1554 (1382) bachelor's degree students graduated. The targets agreed with the Ministry of Education and Culture were easily exceeded, both in resect of doctorates and bachelor's degrees, while the number of master's degrees fell slightly short of the target.

A task force for education, teaching and learning was established to strengthen the management of the university's teaching activities. It's task is to deal with operative academic and related matters where university-wide guidelines, policies, common understanding or position needs to be built.

### Reforming the university's degrees

Aalto University's degree programmes have been systematically revamped to help ensure that graduates are better capable of becoming leaders in their fields, developing them, and promoting change. This is why particular emphasis is being given to cross-disciplinary thinking, collaborative skills, contacts with those already in employment, and an entrepreneurial mind-set.

Close to 1400 students started their studies in the university's updated bachelor's degree programmes in autumn 2013. Following the reforms, nearly all schools now have one common bachelor's degree programme in place. New

bachelor's degree programmes will be launched at the School of Arts, Design and Architecture in autumn 2014.

Progress on reforming master's degree programmes is also continuing. New master's degrees were launched at the School of Business in 2013 and new programmes at the university's other schools will follow on a phased basis between 2014 and 2016.

## Using feedback to develop teaching

Feedback from students is important in developing teaching and the university's degree programmes. A new course feedback system was introduced in 2013 and provides teachers with an easy-to-use tool for collecting feedback from their students and an anonymous feedback channel for students. The system also enables reports based on data that is collected to be produced.

A national feedback questionnaire system for bachelor degree graduates was launched in 2013 and two questionnaires were organised during the year. Aalto University graduates replying to the questionnaire highlighted the value of the university's exchange student opportunities more highly than other respondents on average, and also see international experience as important for their future careers. Aalto University students also tend to work outside the university during their studies more than the average, and their work is more often linked to their field of study. Aalto students also expect better-quality teaching on average, as well as more feedback from their teachers.

#### Growing pedagogical capabilities benefiting teaching

The growing pedagogical capabilities of teaching staff at Aalto University are helping to revamp teaching methods. Teaching skills are now given greater emphasis when recruiting teaching and research staff. The university's pedagogical experts have been involved in evaluating teaching skills at all the university's schools since 2013.

Good teaching practices are shared through the university's networks and training courses. Pedagogical training has been developed and a broader set of pedagogical skills has been offered since 2013. 364 people took part in pedagogical course in 2013 and recorded a total of 1900 study points.

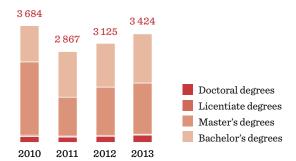

## New learning premises

Learning space designed to inspire students is part of the campus revamp programme and the transformation of university teaching under way at Aalto University. The plan is to concentrate bachelor degree teaching at Otakaari 1, at what used to be the Main Building of the Helsinki University of Technology.

A new, free-form student hub was opened there in December. This features a number of teaching and group work areas, together with computers and printers. A total of 15 similar student and learning hubs have been built elsewhere on the campus.

The Library Building at Otaniemi is to be renovated and remodelled over the next few years and transformed into a learning centre. The new concept was developed with the building's future users during 2013. In addition to a broad range of library services, the new centre will offer resources and space to support a variety of different types of study and work. The new centre is due to be opened in 2016. ■

## **Degrees completed**

# Supporting change and encouraging the creation of new companies

Dialogue with the society helps Aalto University understand and forecast the changing needs of society, both in Finland and globally.

Corporate funding totalled million

Aalto University and its staff impact society in a number of different ways. Over 400 people from Aalto were mentioned by name in the Finnish media in 2013, and the university itself was mentioned around 9 000 times. The university is also increasingly visible in online media internationally and scored some 4 000 hits in 2013.

More than 70 international delegations visited the university in 2013, including numerous ministers, prominent figures in society, and senior staff from other universities. Visitors included the Prime Minister of South Korea, Mr Chung Honown, and the Mayor of Shanghai, Mr Yang Xiong. The President of the Republic of Finland, Mr Sauli Niinistö, also visited the university.

## Close cooperation with the business world

The professors, researchers, and teachers at the universities that merged to form Aalto University had a long tradition of working closely with the business world, both in Finland and internationally - and continuing this tradition is seen as an important priority.

Aalto University takes an active part in the work of Finland's Strategic Centres for Science, Technology and Innovation. These act as joint networks for companies and research bodies to develop expertise covering the bioeconomy, the built environment, energy and the environment, metal products and mechanical engineering, health and wellbeing, and ICT and digital business.

Aalto University also carries out direct joint research with companies in numerous fields. Corporate funding received by the university totalled €21.6 million in 2013. Particularly extensive cooperation took place with 31 companies. These brought a minimum of €100 000 each in funding and over €10 million in all.

### Collaborative partners and international networks

Aalto University's two most important collaborative partners internationally are Tongji University in China and Stanford University in California. Work

with both of these organisations continued in 2013. The municipal authorities in Helsinki and Espoo are also close partners for the university.

Aalto University is a strategic partner for the Technology Academy of Finland, which awards the Millennium Technology Prize. 2013 was the nomination period for candidates for the next prize, which will be awarded in spring 2014 on the recommendation of an international selection committee that includes Academician Riitta Hari of Aalto University.

Aalto University belongs to numerous international networks aimed at promoting collaboration in education, research, and innovation. Cluster, a group of 12 leading European universities of science and technology, is a particularly important network for the university, as is Nordic Five Tech (N5T), which offers joint master's degree programmes. The Cumulus network coordinated by the School of Arts, Design and Architecture is a global forum bringing together 165 design and arts schools worldwide. The School of Business takes part in CEMS, which embraces 28 universities and more than 70 international corporate members. Students at member universities can study for the highly respected CEMS MIM degree.

## Promoting entrepreneurship

Aalto University supports entrepreneurship and the creation of new companies in numerous ways.

Slush, one of Europe's major events for start-ups, was organised for the sixth time in November 2013, by the student-led Aalto Entrepreneurship Society and the Startup Sauna. The latter, which is based at Aalto University and dedicated to promoting start-ups by arranging training, events, incubator services, and trainee exchange programmes, was named the world's leading young university incubator by UBI Networks in May 2013.

The Aalto Center for Entrepreneurship (ACE) offers a selection of innovation, commercialisation, and start-up services to the university's researchers

and students. ACE processed 150 (215) innovation proposals and 53 (17) patent applications in 2013 and supported the creation of 6 (10) new companies that received more than €4 million in outside funding.

The Start-Up Center business accelerator focuses on entrepreneurs with innovative business ideas and a strong will to succeed. During its 16-year existence, it has helped created more than 2 000 new jobs in Finland. An average of 80 companies were based at the Start-Up Center in 2013, of which around a third were fast-growing gazelle companies.

The AppCampus is a global pre-seed funding programme created to develop new mobile applications. Led and managed by Aalto University and funded by Microsoft and Nokia, it supports the development of innovative mobile apps for Windows devices. Close to 60 apps have been launched with AppCampus support and have been downloaded more than 3 million times.

The Aalto Ventures Program (AVP) concentrates on teaching and supporting students who want to launch their own start-ups; and works closely with Stanford University's Technology Ventures Program. A total of 584 students took part in AVP courses in 2013.

## The factory initiative

Aalto University currently has four multidisciplinary platforms or factories in operation today where faculty members, students, companies, and other organisations can learn and research together. The Design Factory, Service Factory, and Media Factory have been operational since 2009, while the Health Factory was launched in 2013.

The Design Factory is Aalto University's most popular destination for visitors. Over 4 000 people visited the Design Factory in 2013, including a delegation led by Crown Prince Haakon of Norway. The Design Factory has acted as the catalyst for similar factories in Shanghai, Melbourne, and Santiago. One is also currently being developed in New York.

#### Quality continuing education and executive education

Aalto University is one of Finland's most active universities in developing and testing new adult education models promoted by the Ministry of Education and Culture.

7 667 (7 570) students took part in Open University courses in 2013. The Open University celebrated the twentieth anniversary of its business and engineering courses in May 2013.

Aalto University Professional Development (Aalto PRO) organises the majority of the university's wide range of non-degree programmes. Together with the Small Business Centre (PYK) and the Urban Planning Research and Training Group, it held around 550 courses attended by approx. 10 500 participants in 2013.

Aalto University Executive Education (Aalto EE) offers a range of high-quality executive education services, and trained around more than 3 000 people in 2013. Aalto EE has 18 years of experience of the Asian market, for example.

Aalto EE, Aalto PRO, and the Small Business Center have built up a strong reputation for their services in Finland and have ranked highly in numerous national surveys.

Aalto University decided in autumn 2013 to spin off all its commercial executive development and continuing education activities into a single company as of 1 March 2014. This has taken place by extending the activities of Aalto EE to include the commercial professional development activities of both Aalto PRO and the Small Business Center. The new entity, known as Aalto University Executive Education, will have annual net sales of approx. €21 million and will employ around 130 people. ■

## Faculty and staff — Campus and infrastructure — Funding

#### A multicultural community and employer

Aalto University aims to offer an inspiring and exciting place to work for its expert faculty and staff and offer a dynamic environment for quality research, artistic activities, teaching, and collaboration. Its HR processes are designed to promote good management and high standards of research and teaching.

The tenure track career system has consolidated its position and is now widely used by all the university's schools. Individual and group-based career guidance is provided to help doctoral students plan their careers.

### Aalto is rapidly becoming more international

Making Aalto University a more international community is a central part of the university's strategy. The multicultural nature and multidisciplinary mobility characteristic of its activities are growing year by year.

27% (24%) of faculty members were non-Finns in 2013. In addition to efficient recruitment processes, the Aalto Family Programme helps staff from abroad settle in and make the most of their stay by familiarising them with Finnish society, culture, and people at the university.

## Addressing leadership and management issues

Aalto University believes in the importance of good leadership and management. University management and heads of departments discuss topical issues related to strategy and leadership regularly at Aalto Leaders' Dialogue events. Three of these events were organised in 2013.

Professors' Summit meetings enable the top management and the professors to discuss issues such as

research, new funding models, and multidisciplinary collaboration. The entire university community is also encouraged to take part in developing issues that affect everyone, such as developing the university's services.

The Strategic Leader programme for heads of departments and other strategic-level staff, together with the Service Leader programme for service managers, were organised for the fourth time in 2013. A total of 165 people from across the university took part in the two programmes.

#### Investing in infrastructure at Otaniemi

The university's main campus is based at Otaniemi and the area will be further developed over the coming years.

Phase II of the renovation and remodelling of Otakaari 1 was completed in 2013 and work on Phases III and IV began as planned. The project is expected to be completed in spring 2015.

The two-stage international architectural competition for a new core campus for Otaniemi, launched in 2012, ended in September 2013. A design entitled 'Väre' by the Finnish architects, Verstas Arkkitehdit Oy, was chosen as the winner. The Aalto University Board has decided to construct the new building on a phased basis. with the targeted completion of Phase I scheduled for 2016. The zoning for the new building, together with the planning of Phase I, was started in 2013.

The university had three campuses and other facilities totalling 315 000 m<sup>2</sup> (324 000 m<sup>2</sup>) of space in 2013, of which the Otaniemi campus accounted for 233 000  $m^{\scriptscriptstyle 2},$  the Töölö campus for 29 000  $m^{\scriptscriptstyle 2},$  the Arabia campus for 43 000 m², and other sites for 11 000 m². Facility costs totalled €71 (66) million.

# Financial position in 2013 – Government funding totalled €275 million

Aalto University's operative income during 2013 totalled €418 (421) million, 0.5% down on 2012. The main sources of income were government funding totalling €275 million from the Ministry of Education and Culture, of which additional funding accounted for €80 million. Government funding increased by €4 million compared to 2012.

In addition to Government funding, research grants, including competitive funding, accounts for a significant part of the university's income and totalled €109 (118) million in 2013. Grants mainly consisted of project funding from Tekes, the Finnish Funding Agency for Technology and Innovation, the Academy of Finland, and the European Union. Project funding provided by the Academy of Finland and the EU both rose in 2013 compared to 2012.

The decline in State finances has been reflected in the Finnish university world. In addition to general cuts affecting the university sector in 2012–2014, the annual additional government funding commitment of €100 million agreed at the time of the founding of Aalto University was cut by €20 million in 2012 and 2013 and has been cut by €30 million for 2014.

# Endowment enhances the university's financial independence

Aalto University has a long-term investment strategy designed to enhance its financial independence and support the implementation of its strategy. The market value of the university's investment portfolio as of the end of 2013 totalled €936 million and it yielded an annual return of 3.3%. As of the end of the year, 33% of the portfolio was invested in equities and 67% in fixed income and money market investments.

Aalto University is committed to following responsible investment principles and approx. 96% of the investment portfolio is managed by outside asset managers that comply with these principles. The university joined *Finland's Sustainable Investment Forum* (FINSIF) in 2013. ■

Annual Board Report 2013 (Based on audited Finnish version)

# The role of Aalto University

The purpose of the Aalto University Foundation, operating as Aalto University, is to promote free research and scientific and artistic erudition, provide higher education based on research, and educate students to serve their country and humanity. The university is an autonomous, multidisciplinary science and art community which operates in the fields of technology, economics, art and design, and in fields closely related to them. The university works in interaction with the rest of the society and the international scientific and artistic communities, and advances the impact of research and artistic activities on society.

The national mission of the university is to support Finland's success through the high-quality research and teaching, to make a positive contribution to building Finnish society, its economy, technology, art and design, internationalization and competitiveness, and to promote the welfare of humankind and the environment. The university respects the freedom of science, art, and education.

# **Activities during 2013**

2013 was Aalto University's fourth year of operations. The university continued the implementation of its strategy aimed at becoming a world-class university by 2020. The main priorities during the year were recruitment under the tenure track academic career system, implementation of the new bachelor's degree programmes, and the reform of master's degree programmes. By the end of the year, a total of 231 new tenure track positions had been opened, of which 155 had been filled. 31% of positions were filled by international recruits and 24% by women.

In the fall of 2013, Aalto University's additional government funding for 2014 was cut by €10 million, bringing it down from the original commitment of €100 million to €70 million. Because of these funding cuts, the university will record an operative deficit of approx. 5% in 2014 to secure the achievement of its ambitious academic goals.

Based on a decision by the Board of Trustees, Aalto University started a Service Development Program for 2013–2015. The purpose of the program is to achieve cost savings and quality improvements in the university's internal services. The scope of the program covers all internal services at Aalto University.

## Research

A total of some 2 900 (2 700) international refereed articles were published at the university, an increase of 7% on 2012. The university's publication impact is expected to develop positively, both quantitatively and qualitatively, as the university progresses in  $implementing\ its\ strategy.\ External\ competitive\ research\ funding$ received by Aalto University increased by 6% in 2013. Funding from the Academy of Finland was €34 million (€32 million) and that from European Union research funding programmes totaled €20 million (€19 million). External research funding is expected to remain at a similar level in 2014, despite the continued financial pressures on public research funding.

Seven (7) national centres of excellence were based at Aalto University during 2013, funded on the basis of earlier funding decisions. As of the end of the year, two (2) Academicians of Science worked at the university. The quality of research carried out at the university is also reflected in the fact that the university has 13 (12) recipients of research grants from the European Research Council (ERC), seven (7) Academy professors, 34 (37) Academy researchers, and 14 (15) Finland Distinguished Professor Program (FiDiPro) professors and fellows.

#### **Teaching**

The number of degrees granted by the university developed positively in 2013. A total of 1553 (1382) students completed a bachelor's degree, 1614 (1519) completed a master's degree, and 229 (192) a doctorate. The number of full-time equivalent degree students fell slightly in 2013, to 11 337 (11 552). The total number of degree students was 19 683 (19 993). A total of 476 335 (465 782) ECTS study credits were earned by active degree students, equivalent to an average of 35 (33) study credits per active degree student. Foreign students totaled approx. 3 000 (2 900), of whom 76% were studying

Aalto University's bachelor's degree programmes were reformed during 2012 and the new ones implemented for the first time in fall 2013. New master's degree programmes were also implemented in the School of Business. The rest of the master's degree programmes will be reformed in 2014 and new ones implemented between 2015 and 2016. In line with the two-tier Bologna model, the bachelor's and master's degree programs will be clearly separated. In terms of student numbers, the emphasis will continue to shift gradually to master's degrees

### **Artistic activities**

Aalto University achieved significant visibility in international artistic exhibitions and events and received 31 international awards covering all artistic fields covered by the university. Aalto University aims to integrate artistic activities with research. A significant new initiative is the ChemArts program, which is studying the potential of cellulose fiber and testing its use as a raw material for use in textiles. Aalto University had an active role in the 'Design Finland' programme coordinated by the Ministry of the Employment and the Economy and the Ministry of Education and Culture. The program will outline key targets for using design in both industry and commerce and the public sector.

## Societal impact

Reflecting Aalto University's impact on and contribution to society, the university received a total of €96 million (€105 million) in nonacademic research funding in 2013. A joint AppCampus project in collaboration with Nokia and Microsoft approved 157 (80) start-up

The Aalto Center for Entrepreneurship (ACE) offers a selection of innovation, commercialization, and start-up services to the university's researchers and students, and other stakeholders. The center processed 150 (215) innovation proposals, filed 53 (17) patent applications, and supported the formation of six (10) new companies set up by Aalto University's researchers and students.

Figures in parenthesis refer to 2012 unless otherwise mentioned.

In addition, courses arranged by the Open University had approx. 7 700 participants, while continuing education courses had around 10 500 participants during the year.

Aalto University decided in 2013 to extend the activities of Aalto University Executive Education Oy (Aalto EE) to include the commercial professional development activities of both Aalto University Professional Development (Aalto PRO) and the School of Business' Small Business Center (Pienyrityskeskus). The new entity will retain the existing name of Aalto University Executive Education Oy. The merger will clarify the position of the Aalto University Foundation, with the non-profit aspects of activities remaining the responsibility of the foundation and business activities that of a separate company. In addition, it will enable Aalto EE to offer customers solutions that cover a wider range of organizational and professional needs.

Aalto University's societal impact is expected to expand in the future through its numerous national and international projects, and collaboration with the university's various stakeholders is also expected to deepen.

## Governance

The main governing bodies of the university are the Board, the President, the Committee of Academic Affairs, and the deans of the university's schools.

The Board consists of seven external members, including the chair and vice chair, and is responsible for decisions concerning the university's strategy, its annual operating plan and budget, and for approving the financial statements and the university's regulations. The Board also appoints the President, the Vice-Presidents, and staff reporting directly to the President. The Board ensures that the university's operations are organized appropriately and that its assets are invested in a safe and productive way. The Board had four meetings during the year and additional email-based meetings.

The composition of the Board remained unchanged in 2013.

The President is responsible for leading the university's operations in accordance with the duties set out in the Finnish Universities Act and orders and instructions provided by the Board. The President is responsible for managing the university in a financially efficient manner.

The Committee of Academic Affairs is a common organ as defined by the Finnish Universities Act and is responsible for matters such as curricula, degree requirements, the principles used for admitting students, and for establishing the bodies necessary to govern the university's research and teaching. In addition, it appoints the Nomination Committee and the members of the Board based on proposals made by the Nomination Committee.

The Nomination Committee consists of five members, of which two represent the university's private founders.

The university is organized internally into six schools and shared service units. Led by their deans, the university's schools consist of departments, led by department heads. The university's schools are responsible for teaching and research in their respective disciplines and are academically independent within the framework established by the university's strategy, guidelines, and annual operating plan and budget. The university's shared service units are organized in a

matrix in which joint service processes are defined centrally for the university, while services are produced locally in academic units.

Three new deans were appointed during the year: Risto Nieminen (School of Science), Janne Laine (School of Chemical Technology) and Gary Marquis (School of Engineering). In addition, Anna Valtonen was appointed as Dean of the School of Arts, Design and Architecture, and took up her post on 1 March, 2014.

The university and its subsidiaries form the Aalto University Group. The university's subsidiaries are Aalto University Properties Oy (66.7% holding), Aalto-Holding Oy (100% holding), and the property company, Kiinteistöosakeyhtiö Helsingin Pohjoinen Hesperiankatu 23A (50% holding). The Board and the President are responsible for the governance of the Aalto University Group. The President appoints the university's representatives to the annual meetings of subsidiaries, at which the Board members of these companies are elected. The boards of subsidiaries elect their CEOs, who are responsible for the operations of these companies.

## Faculty and staff

The average number of faculty and staff in 2013 decreased slightly from 2012, and totaled 5 171 (5 277). A total of 53% (52%) of the faculty and staff were employed in teaching and research positions, 14% (15%) were degree students working as research and teaching assistants, and 33% (33%) were employed in other positions. In addition, 24% (23%) of personnel were doctoral students.

A total of 39% (37%) of personnel held a permanent employment contract and 81% (79%) worked full-time. Women accounted for 39% (38%) of personnel. A total of 15% (14%) of personnel will reach the age of 65 within the next 10 years. The proportion of non-Finnish personnel increased to 19% (16%), highlighting the strong international focus of the university.

As of the end of 2013, the university had 382 (366) professors, of whom 159 (143) had fixed-term contracts, 19% (18%) of professors were women. Approx. 43% (45%) of professors will reach the age of 65 within the next 10 years. By the end of 2013, 348 professors had been nominated to the new tenure track.

The average number of personnel employed by the Aalto University Group during 2013 was 5 265 (5 337), and personnel costs totaled €272 million (€272 million), of which the university accounted for €266 million (€267 million). Salaries and other remuneration paid to the members of the Board, the President, and the members of the boards of Aalto University Group companies and their CEOs totaled €998 000 (€911 000).

## Campus and infrastructure

Aalto University Board decided in June 2011 to locate the university's main campus in Otaniemi, Espoo. All teaching for the university's Bachelor's Degree programmes will shift to the Otaniemi campus on a phased basis, beginning in 2013. The activities of the School of Arts, Design and Architecture will move to Otaniemi in stages, from 2014 onwards. As a result, the Aalto University Group has an extensive campus investment program, which includes investments in new buildings, as well as, renovation investments covering existing buildings.

The campus investment program progressed during 2013 with the completion of Phase II of the renovation of Otakaari 1. Phases III and IV were started as planned. A proposal known as Väre by Verstas Arkkitehdit Oy was chosen as the winner in the architectural competition for the new building that will be constructed next to the coming metro station currently being built. The new building will enable the School of Arts, Design and Architecture to move to Otaniemi. The new building will be constructed in two phases, with the targeted completion of Phase I scheduled for 2016. The zoning for the new building, as well as planning for Phase I, was started during the year.

Due to financial pressures, the university aims to make more efficient use of its facilities. In 2013, the university reduced its facility usage by 3%. The university had three campuses and other facilities totaling 315 000 m<sup>2</sup> (324 000) in 2013, of which the Otaniemi campus accounted for 233 000 m $^2$  (240 000) the Töölö campus for 29 000 m $^2$ (31 000) the Arabia campus for 43 000 m<sup>2</sup> (43 000) and other sites for 11 000 m<sup>2</sup> (10 000). The university's facility costs totaled €71 million (€66 million).

## **Endowment**

The purpose of the Aalto University endowment is to enhance the university's financial independence and support the implement of its strategy. The endowment portfolio had a market value of €936 million (€901 million) as of the end of the year and the annual return was 3.3% (9.7%). As of the end of 2013, 33% (25%) of the portfolio was held in equities and 67% (75%) in fixed-income and money market investments.

# Sustainable development

Aalto University develops its activities in accordance with the principles of sustainable development. The Academic Roundtable for Sustainability and the Sustainable Campus Board started their activities during 2013. Their role is to set sustainability-related objectives and monitor their progress. Aalto University's annual Sustainability Report covers all university activities: research and teaching, sustainable campus, and societal impact. The report can be found at www.aalto.fi/sustainability.

# **Operating environment** and risks

The main risks associated with the university's operating environment are linked to cuts in the public sector and the impact that these cuts might have on the university sector. Uncertainty in the financial markets can also have a negative impact on the returns generated by the university's investments and on the funding of the Aalto University Group's investment program.

Financial pressures affecting the public sector have a major impact on the environment in which Finland's universities operate. These pressures have had a concrete impact on funding for 2013-2014. The index-based increase in university funding was frozen in 2013 and resulted in a drop in total university funding in real terms.

Aalto University's additional funding for 2014 has been cut from €80 million to €70 million, compared to an original commitment of

In addition, the public funding allocated to research and innovation is also expected to decrease, which will affect the activities of funding agencies such as the Academy of Finland and Tekes, and may have a negative impact on Finnish universities. Pressures on public-sector funding represent Aalto University's key strategic risk, and the likelihood of further negative impact from this risk remains elevated.

The development of the university's investment portfolio can contain financial risks associated with the uncertainty of the financial markets, which could have a negative impact on the university's long-term funding.

The targets set for the new campus call for a solid investment plan covering the next 15 years and an approx. 25% reduction in current spatial usage. Uncertainty in the financial markets could make funding the investment program more difficult in the future and delay its implementation and have a negative impact on the university's ability to implement its teaching and research strategy. As the majority of the buildings in Otaniemi are of historical significance and protected by the National Board of Antiquities, it could prove impossible to achieve spatial efficiency targets in some areas, which could increase the university's costs as a result.

The principle underlying the university's property insurance cover is to insure key assets with a relatively high level of own risk and secure all assets that are essential and material for the university's operations. Aalto University also has liability insurance cover in respect of possible damage caused by its operations to third parties, as well as management liability insurance cover in respect of financial damage that might result from the actions of the university's management and the members of the Board and the boards of its

# Financial position in 2013

The operative income of the university (Pro forma) during the 2013 financial year totaled €418 million, 0.5% down from the €421 million recorded in 2012 (2011: €423 million). The main sources of income were government funding, which totaled €275 million (€271 million), and research grants totaling €109 million (€118 million). Grants mainly consisted of project funding from the Finnish Funding Agency for Technology and Innovation (Tekes), the Academy of Finland, and the European Union.

Total operative expenses were €420 million, a decrease of 0.9% on 2012 (2012: €424 million, 2011: €395 million). The majority of operative expenses comprised personnel and facility expenses, of which the former accounted for 63% and the latter for 17%. Personnel costs decreased by 0.3%, while facility costs increased by 6%, mainly because of index-linked increases under the university's rental agreements and renovated facilities returning to use.

An operative deficit of €2 million (deficit of €4 million) was recorded for the year.

Income from investment and financing activities was €42 million (€30 million), primarily from profits on the sale of investments as a result of portfolio allocation changes during

2013. Impairments related to investment and financing activities totaled €11 million (€0,4 million). Impairments mainly resulted from investments in emerging markets. Investment and financing activities recorded a total surplus of €31 million (€29 million). In accordance with Finnish Accounting Standards, unrealized gains are not shown as profit in the income statement.

The net surplus for the year was €33 million (2012: €29 million, 2011: €14 million, 2010: €28 million), corresponding to 7% of total income (2012: 6%, 2011: 3%, 2010: 7%).

The university's balance sheet totaled  $\ensuremath{\mathfrak{e}}$ 1 047 million as of the beginning of the year and €1 075 million as of the end of the year.

In terms of assets, investments increased by €70 million from the €864 million recorded in 2012, to €934 million as a result of changes in portfolio allocation. All investments are valued at purchase value or market value, if the latter is lower. Cash and bank decreased to €50 million (€81 million). Short-term receivables decreased by €9 million to €56 million, driven by decrease in investment-related accruals compared to 2012. In addition, receivables from the Academy of Finland were invoiced instead of accrued, which caused a significant decrease in accrued income and a corresponding increase in accounts receivables.

In terms of equity, changes were mainly the result of the surplus generated during the financial year.

 $Short\text{-}term\ liabilities\ primarily\ consisted\ of\ advance\ payments$ and accrued payroll expenses and totaled €76 million (€80 million). The decrease was mainly due to decreased accounts payables corresponding to decreased level of purchases towards the year end.

Cash flow from operations during 2013 increased to €10 million (-€5 million) mainly due to a decrease in short-term receivables. Cash flow from investments totaled -€44 million (-€160 million), of which -€39 million was associated with investment activities due to portfolio allocation changes and -€5 million with investments in IT and research and teaching infrastructure. Cash flow from financing was €4 million (€3 million), as additional capital was received for the special purpose fund with separate assets. The university's total cash flow was -€30 million (-€161 million).

## Aalto University Group

The Aalto University Group recorded income totaling €479 million (2012: €470 million, 2011: €444 million, 2010: €414 million) and expenses totaling €440 million (€432 million) in 2013, and a surplus for the financial year of €39 million (2012: €38 million, 2011: €21 million, 2010: €38 million).

The Group's balance sheet as of the end of the year totaled  $\[ \]$  376 million (€1 304 million). This increase was mainly due to a long-term bank loan drawn by Aalto University Properties Oy (€40 million). The Group's equity ratio at the end of the financial year was 79% (2012: 80%, 2011: 79%, 2010: 75%). Cash flow from the operations of the Aalto University Group totaled €42 million (€12 million) and cash flow from investments was -€70 million (-€200 million). Cash flow from financing was €38 million (€2 million). Total cash flow for the year was €10 million (-€186 million).

The Group's largest subsidiary, Aalto University Properties, owns and manages the majority of the facilities used by the university. The turnover of the sub-group was €48 million in 2013 (€44 million) and it recorded a profit of €13 million (€11 million). The balance sheet totaled to €381 million (€336 million).

Aalto Executive Education, owned by Aalto Holding, recorded a turnover of £13 million in 2013 (£12 million) and a net profit of €1 million (€1 million).

All Aalto University Group companies have prepared their own financial statements for the financial year.

## **Auditors**

Jarmo Lohi (APA, CPFA) and Tiina Lind (APA, CPFA) acted as the university's auditors, with Mikko Rytilahti (APA, CPFA) and Ari Lehto (APA, CFPA) of Ernst&Young Oy as their deputies. The Board of Trustees decided to elect KPMG Oy Ab to act as the external auditor of the Aalto University Foundation in 2014. The responsible auditors will be Leif-Erik Forsberg (APA, CPFA) and Jorma Nurkkala (APA, CPFA).

## Major events after the financial year

No events of a material nature affecting the financial status of the Aalto University Group and its financial statements for 2013 took place between the end of the financial year and the preparation of the financial statements.

## Outlook

The university's total funding is expected to decrease in 2014, mainly due to the cut in Aalto University's additional government funding. Because of these funding cuts, the university is expected to record an operative deficit of approx. 5% in 2014 to secure the achievement of its ambitious academic goals. The equity ratio of the Aalto University Group is expected to remain at an excellent level.

Although the pressures on public funding remain elevated, Aalto University will continue implementing its strategy, and the tenure track academic career system in particular, in 2014.

As of the beginning of 2014, 76 tenure track slots are open. Publication impact is expected to develop positively and as the new bachelor's and master's programmes are implemented, the balance in education will start to shift to master's degrees. The university's faculty and staff are expected to continue becoming increasingly international. The university expects cost savings and quality improvements from the Service Development Program. In addition, the proportion of service personnel is expected to decrease, while the share of research and teaching staff is expected to increase.

## **Aalto University Foundation**

Aalto University Foundation forms a group, domiciled in Helsinki. The annual statements and financial reports of the Aalto University Foundation are available at Aalto University Foundation, Lämpömiehenkuja 2, 02150 Espoo.

## **Accounting principles**

Aalto University Foundation's accounting complies with the principles laid down in the Finnish Accounting Act (1336/1997) and the Accounting Code for Universities (1/500/2013) issued by the Ministry of Education and Culture (MoE).

#### Valuation of fixed assets

Fixed assets have been valued at the original acquisition cost deducted by accumulated depreciation according to plan. Depreciation according to plan has been calculated from intangible assets according to straight-line depreciation and from tangible assets based on straight-line depreciation or declining depreciation. Minimum value for activating fixed asset to balance sheet is 10 000 euro.

Depreciation according to plan categories are:

Asset group	Depreciation method	Period
Intangible assets	Straight-line depreciation	4-10 years
Buildings	Straight-line depreciation	23-40 years
Longstanding teaching		
$and\ research\ equipment,$		
heavy machinery	Straight-line depreciation	15 years
Equipment, machinery		
and furniture	Straight-line depreciation	4-5 years
	or declining depreciation	/25%

### Valuation of inventories

Inventories are valued in the balance sheet at acquisition cost or at replacement cost or at probable selling price, whichever is the lowest.

## Valuation of financial assets

Financial assets are valued in the balance sheet at acquisition cost or net realizable value if lower.

## Value added tax compensation receivables

According to the University Act the Ministry of Education and Culture shall compensate to the universities the value added tax included in the cost incurred by the universities in the provision of  $% \left\{ 1\right\} =\left\{ 1$ educational services and in procurement and facility rents relating to research other than commercial research. During the financial year the foundation has followed net procedure as regards to the VAT. The receivables relating to the VAT compensation from the MoE is recorded in long-term receivables and has been calculated according to the principles set in the Accounting Code for Universities.

### Revenue recognition

The revenue from ordinary operations of the university is recognized as a percentage of completion using cost to cost method. The non-invoiced turnover of the subsidiaries involved in business transactions is recorded in the accounts according to estimated level of completion of the deliverable. The corresponding receivable is recorded in the accrued income. Received advance payments are recorded in the balance sheet as short-term debts. The revenue from educational programmes is recorded as income in proportion of number of training days provided.

#### **Business activities**

Business activities are operations that according to tax authorities are subject to corporate income tax. In accounting all projects that fulfill the business activity characteristics defined by tax authorities have been classified as business activities.

## Statutory pension

Statutory pension for employees born before January 1st, 1980 and transferred from the three earlier universities has been arranged through Keva and for other employees in an external pension insurance company. Pension fees are expensed according to accrual basis.

## Items in foreign currencies

Receivables and payables in foreign currencies have been translated into euro at the average exchange rate in force on the last day of the financial year.

## **Management compensation**

The management compensation includes salaries and other compensation paid to the members of the Foundation Board of Trustees and the President and for the Board members and CEO's of the Group subsidiary companies.

### **Investment grants**

From beginning of year 2013 investment grants are booked as a deduction of acquisition value and respective refund liability is no longer included in Other short-term liabilities. Refund liability from years 2011-2012 (ca. €2.1 million) has been transferred to net acquisition value during 2013. Year 2012 has not been restated accordingly.

### Pro forma income statement

A Pro forma income statement is included in the Financial Statements. In order to give a better overview of the financials. Pro forma income statement does not follow the official income statement structure. Pro forma income statement is not audited.

## Accounting principles and extent of the consolidated accounts

The Group consolidation is done according to the acquisition cost method. In addition to the parent organization Aalto University Foundation, the accounts of the subgroups Aalto Holding Oy and Aalto-Yliopistokiinteistöt Oy have been consolidated.

In addition, the proportion of Aalto University Foundation's shareholding in the associated real estate company Kiinteistö Oy Helsingin Pohjoinen Hesperiankatu 23A (50.0%) and the associated housing company Asunto Oy Eteläinen Hesperiankatu 4 (26.98%) are consolidated in the group accounts.

Associated companies Otaverkko Oy (47.37%) and Otahalli Oy (25.0%) have not been consolidated in the group accounts as consolidation is not necessary to give true and fair view of the financial situation of the Aalto University Foundation group.

Internal business operations, internal receivables and liabilities, mutual ownership as well as internal profit sharing have been eliminated.

Goodwill's depreciation plan is five year straight-line. The income statement of the foreign group company has been converted into euros with ECB's average exchange rate for the financial year. Balance sheet has been converted into euros with the exchange rates at the end of the financial year. Differences in exchange rates and elimination of shareholding caused by conversions are recorded in Surplus of the financial year.

## **21. DERIVATIVE CONTRACTS**

Derivatives in the Aalto Group consist of commodity (electricity) and interest rate swap agreements as well as interest rate and currency exchange  $swaps. \ Commodity \ swap \ agreements \ provide \ protection \ against \ fluctuation \ of \ electricity \ prices. \ Swap \ agreements \ extend \ to \ years \ 2014-2018 \ Inter-prices \ provide \ provide$ est rate swaps will protect against intetest rate fluctuation by swapping the variable interest rate of bank loans to fixed rate. The contracts existing at the end of the fiscal year provide approximately 81% protection rate of the total interest-bearing loan portfolio.
